Advantages of "NEWMODE" Underwear

The back section, adjusted after corset is put on, is the finest arrangement yet devised, as it gives the most perfect protection, does away with all bunching, and makes it impossible for the combination to gape anywhere. The three illustrations above show the neat appearance of the garment, with and without the corset. In addition to this special closed crotch feature the "Newmode" is made one button lower than the ordinary neck, and the ankle cuffs are extra long and good fitting.

View A shows garment only.

View B shows front view when back section is fastened over corset.

View C shows neat effect when back is drawn up over corset.
